Claims 1-39 (canceled)

- 40. (currently amended) A flexible, reclosable package comprising:
  - (a) first and second panel sections defining an interior;
  - (b) a zipper closure sealed to each of first and second panel sections along a top edge, the zipper closure extending from a first side edge to a second side edge and comprising first and second mating profiles;
  - (c) a slider device constructed and arranged for mounting on the zipper closure and for interlocking the first mating profile with the second mating profile when the slider device is moved in a first direction and disengaging the first mating profile from the second mating profile when the slider device is moved in a second opposite direction; the slider device being operably mounted on the zipper closure; and
  - (d) a first tamper-evident structure disposed at the top edge and encasing a first portion of the zipper closure, wherein when sealed, the tamper-evident structure [[having]] has an opening exposing the slider device, and wherein the opening is defined by the tamper-evident structure.

- 41. (previously presented) The package according to claim 40, wherein:
  - (a) the slider device is positioned within the opening of the first tamper-evident structure.
- 42. (previously presented) The package according to claim 40, further comprising:
  - (a) an area of weakness extending along the first tamper-evident structure.
- 43. (previously presented) The package according to claim 42, wherein:
  - (a) the area of weakness is a perforation line.
